

With over 120 years of facilities management experience, OCS combine industry expertise with specialist knowledge and world-class resources.

Our team provide outstanding facilities management, security, passenger and specialist services to train operating companies, rail terminals, depots and stations across the UK.

We utilise leading IT technology platforms for optimised resource allocation to enhance productivity and track our people and assets across our operations.

We provide facilities management and rail support services for train operating companies, stations and depots, rail terminals, on-board, in-journey, rolling stock, offices and transportation hubs. Not only do we provide the best possible service, but we also ensure our solutions are sustainable, secure and offer best value.
