

Stadium Security Specialists

in partnership with **Dallmeier**

Providing a safe environment for people at a sports ground is a wide-ranging responsibility for sports ground management. This includes the management of crowd disorder and other anti-social behaviour by groups or individuals which could cause physical harm or injury to people at the ground.

Based on information for the 2016 to 2017 season there were 1,638 football-related arrests, the 3 most common offence types were public disorder (31%), violent disorder (21%) and alcohol offences (16%).

It's not just crowd disorder which safety officers have to consider, the threat of terrorism in crowded places is growing and can come in many different forms, vehicles as a weapon, co-ordinated gun attacks, individual gun attacks and person borne explosive devices.

About OCS and Dallmeier

OCS is a national provider of security systems and manned guarding. One of our key strengths is the ability to provide fully integrated electronic systems and manned guarding solutions under a single management structure. We are passionate about ground safety, and we offer a wide range of surveillance CCTV security systems and can supply the latest in camera design and operation through our partnerships with the major CCTV manufacturers. Dallmeier is one of those partners, they are a world leading provider of network-based video surveillance and an expert in stadium security. Together, we can offer a solution for stadium security which is world leading.

Unique Multi Focal Technology

The Dallmeier Panomera camera was especially developed for video surveillance of expansive areas. It can survey large widths of area along with large distances providing levels of resolution usually only achieved with multiple cameras.

Its unique Multi Focal Sensor system, records the entire scene all the time, even when only a small area is being viewed. So you will never miss an incident and can retrospectively look at any incidents and investigate supporter complaints.

“We are very confident that the complete solution inclusive of the Panomera multifocal sensor system being supplied by Dallmeier is the best we could find in the market at this time. The product gives us the maximum opportunity to identify those committing offences inside the stadium and will greatly assist in reducing crime and anti-social behaviour inside Goodison Park.”

Video Surveillance Funding

To enable non Premier League clubs to update and enhance their video surveillance solutions in a cost-effective way the FSOA has set up a supplier partnership scheme.

- + Free on-site system audit
- + Preferred pricing from OCS and Dallmeier
- + Funding support from the FSOA
- + Short term installation for high category games

OCS has worked recently with Leighton Orient and Wycombe Wanderers to upgrade their security system. Both clubs received a significant reduction in the overall cost as part of OCS and Dallmeier's partnership scheme with the FSOA.

Complete Stadia Security Solutions

Perimeter security in line with the latest Counter Terror advice, which provides complete observational awareness of the Stadium for monitoring unusual behaviour and crowd patterns both pre and post event.

Training ground security including Automatic Number Plate Recognition (ANPR), access control and remote access to cameras between the Stadium and Training grounds. The surveillance system is designed to include installation flexibility for various stadium configurations, and the systems installed are in line with current Sports Ground Safety Authority guidelines.

“The camera is fine - we have no issues with it. We have used the camera many times to apprehend supporters which with our standard camera's we would have missed, we have confirmed arrests and the footage clearly identifies culprits to the police”

Premiership Club Stadium Manager

Why choose OCS and Dallmeier?

- + Proven experience in the stadia sector
- + OCS has installed Dallmeier surveillance technology in the following clubs: Arsenal, Chelsea and Bournemouth
- + Multi-focal sensor technology – which means everything is in view
- + Utilised by multiple venues at the 2018 FIFA World Cup Russia
- + Leasing options available
- + Recommended by the FSOA (Football Safety Officers Association)

Other benefits

- + The use of Panomera cameras is a cost-effective solution, reducing the infrastructure requirements and number of cameras required
- + Match day support provided by a trained OCS technician
- + Pre-season and mid-season preventative maintenance checks
